

Chameleon Downspout nozzle

**The Froet
Chameleon
Downspout
nozzle
another
industry
first!**

- Considerable Labor Savings
- Many standard colors
- Many more custom colors
- Fits all commonly used pipe materials
- Optional flapper
- Low profile to wall surface
- Architecturally pleasing
- High Corrosion resistant Alum alloy
- Powder coated finish
- Zero VOC's
- Unique attachment design

All the industry has ever offered is bronze, brass or stainless steel. What, those materials did not fit with your wall color well I guess they were not concerned with that issue. Well you now have a choice of colors! You are probably wondering how much more this is going to cost me, right? Your new go to spout will be competitively priced, if not less expensive than what you are now using. This spout also has a new creative attachment method that will fit all the commonly used pipe materials. This is a low profile spout it only protrudes 2 1/2" from the wall.
