Froet roof drains the only roof drains with a 25 warranty

With 25 years experience in the roof industry it has given us a lot of hands-on knowledge of roof drains in their environment. Back in the early years it was very uncommon to replace a roof drain sump during a reroof and some were well over 50 years old. Why; Because they were heavy tough pieces built to last. Today that has all changed, due to whatever reason it is now all about “cheap”. Installing something that will not perform as required is not cheaper, it can cost much more. In the neighborhood of \$1000.00 to \$3000.00 per drain. That is why Froet has always offered a durable, high quality and cost competitive product like those of years gone by. We are so confident in our product that we offer two different options for 25 year warranties for our drains. Talk to your local Rep. or visit our website to find out why Froet is the only real choice.
